## CAREER CONVERSION PROGRAMME (CCP) for Experience Design (UX/UI)

The design profession is fast evolving due to technology and the internet. A new generation of savvy “tech native” customers demand companies to deliver holistic, user-friendly and customer-centric experiences. Businesses need to evolve or be left behind, and central to this evolution is the User Experience Designer.

Our Career Conversion Programme aims to help Singaporeans embark on more fulfilling careers in the exciting new field of Experience Design. The six-month Experience Design (UX/UI) programme is aimed at placing and training professionals, managers, executives and technicians (PMETs) looking for a career

conversion into occupations such as UI Designer, UX Researcher and CX Consultant, etc.

The training comprises formal training in areas such as research methodology, UX for digital & spatial and design thinking, a collective project and on-the-job training. Methodology is the Programme Manager for the Career Conversion Programme for Experience Design (UX/UI).

All CCP trainees will also get access to Methodology’s expert-mentoring and bootcamp/conference.
